PROFESSIONAL SUMMARY

Motivated Computer Science student and self-driven creative professional with hands-on experience building full-stack web applications and producing polished graphic design assets. Skilled at translating ideas into functional digital products — from responsive front-end interfaces to server-side logic — while maintaining a strong eye for visual communication and brand identity.

EDUCATION

Feb 2025 – Present	BSc in Computer Science (BSCS), National University of Modern Languages (NUML) · Lahore - Key areas: web development, programming fundamentals, data structures, databases. - Relevant tools & tech: HTML, CSS, JavaScript, C/C++, Java, MySQL. - Expected graduation: June 2029.
Sep 2022 – Mar 2024	Intermediate in Computer Science (ICS), Crescent Model Higher Secondary School & College · Lahore Main subjects: Computer Science, Mathematics, Physics.

PROJECTS

2024 – Present	HungerHub — Food Delivery Web App <i>Full-Stack · HTML / CSS / JS / PHP / MySQL</i> - Designed and developed a complete food-ordering platform with dynamic menu browsing, cart management, and order tracking. - Built responsive front-end with HTML/CSS/JS; back-end powered by PHP with phpMyAdmin database.
2024 – Present	AirLine-X — Flight Booking Web App <i>Full-Stack · HTML / CSS / JS / PHP / MySQL</i> - Built a flight-search and booking system for browsing routes, selecting seats, and confirming reservations. - Applied consistent LAMP-style architecture mirroring real-world industry practices.
2023 – Present	Graphic Design Portfolio <i>Freelance & Academic</i> - Created e-books (Level 2), promotional banners, brand logos, and ad creatives for clients. - Produced visual assets — banners, logos — for university events and student organisations.
